

- ii. Actively encourage sick employees to stay home until they are free of fever (without the use of medication) for at least 72 hours (three full days) AND symptoms have improved for at least 72 hours AND at least seven days have passed since symptoms first began. Do not require a healthcare provider's note to validate the illness or return to work of employees sick with acute respiratory illness; healthcare provider offices and medical facilities may be extremely busy and not able to provide such documentation in a timely way;
 - iii. Ensure that your sick leave policies are up to date, flexible, and non-punitive to allow sick employees to stay home to care for themselves, children, or other family members. Consider encouraging employees to do a self-assessment each day to check if they have any COVID-19 symptoms (fever, cough, or shortness of breath);
 - iv. Separate employees who appear to have acute respiratory illness symptoms from other employees and send them home immediately. Restrict their access to the business until they have recovered;
 - v. Reinforce key messages — stay home when sick, use cough and sneeze etiquette, and practice hand hygiene — to all employees, and place posters in areas where they are most likely to be seen. Provide protection supplies such as soap and water, hand sanitizer, tissues, and no-touch disposal receptacles for use by employees;
 - vi. Frequently perform enhanced environmental cleaning of commonly touched surfaces, such as workstations, countertops, railings, door handles, and doorknobs. Use the cleaning agents that are usually used in these areas and follow the directions on the label. Provide disposable wipes so that commonly used surfaces can be wiped down by employees before each use;
 - vii. Be prepared to change business practices if needed to maintain critical operations (e.g., identify alternative suppliers, prioritize customers, or temporarily suspend some of your operations); and
 - viii. Comply with all applicable guidance from the U.S. Centers for Disease Control and Prevention and the Ohio Department of Health regarding social distancing.
- 8. Sector Specific COVID-19 Information and Checklist for Contact Sport Practices and Non-Contact Sport Competitions.** Activities, leagues, organizations, businesses or employers, whether currently open or reopening, are to take the following actions:
- a. **Players, Coaches, Athletic Trainers, and Officials**
 - i. Players, coaches, athletic trainers, and officials must conduct daily symptom assessments. Anyone experiencing symptoms, including fever or chills, cough, shortness of breath or difficulty breathing, fatigue, muscle or body aches, headache, new loss of taste or smell, sore throat, congestion or runny nose, nausea or vomiting, and diarrhea, must stay home.
 - ii. Athletic trainers must wear a face covering when attending to an injured player, preferably a medical-grade mask, except for one of the following reasons:
 1. Facial coverings in the work setting are prohibited by law or regulation;
 2. Facial coverings are in violation of documented industry standards;

- i. Six-foot social distance must be maintained between individuals except when on the field or court of play.
- ii. Physical contact is only permitted within the rules of the game during competitive practice. Players, coaches, and officials are not to physically contact each other before or after competitive practice (i.e. greetings, team huddles, high-fives, congregating, etc.)
- iii. Limit time spent on activities where players are in close proximity for extended periods of time (e.g. repeatedly practicing corner or penalty kicks in soccer or rebounding drills in basketball).
- iv. Facilities/clubs/teams must ensure that facilities have adequate space for social distancing for players, coaches, officials, athletic trainers, parents/guardians, and spectators off the field or court of play.
- v. No congregating before or after practices or games is permitted.
- vi. Prior to competitive tournaments for non-contact sports, tournament organizers must alert the local health department.
- vii. It is recommended that, if possible, during practices, consider putting players into small groups that remain together through practice stations rather than mixing groups for station to station.

d. Equipment

- i. Whenever possible, equipment and personal items (such as water bottles) should have proper separation and should not be shared. If equipment must be shared, proper sanitation should be performed between users. Water bottles, food, and drinks should not be shared.
- ii. It is recommended that, if possible, competing players/teams should not use the same equipment.
- iii. It is recommended that, if possible, make sure there are adequate supplies of items and equipment to the extent possible to minimize the need for sharing (e.g. bats, protective gear, etc.)

e. Facilities and Venues

- i. Time should be allotted between practice sessions to allow teams to exit fields/facilities prior to new teams arriving and for proper sanitizing for shared spaces (benches, equipment, etc.)
- ii. Organizers of non-contact sports tournaments must follow applicable guidance for venues (including grandstands) in which the tournament is held.
- iii. It is recommended that, if possible, promote good hand hygiene and respiratory etiquette. Flyers and signs are available at [coronavirus.ohio.gov](https://www.coronavirus.ohio.gov).
- iv. It is recommended that, if possible, make hand sanitizer available at convenient locations.
- v. It is recommended that, if possible, if playing inside, ensure ventilation systems or fans operate properly. Increase circulation of outdoor air as much as possible, such as opening windows and doors unless doing so poses a safety or health risk.

On February 3, 2020, the Ohio Department of Health trained over 140 personnel to staff a call center for COVID-19, in the event it was needed.

On February 5, 2020, the Ohio Department of Health began updating and notifying the media of the number of PUIs in Ohio every Tuesday and Thursday.

On April 30, 2020, the Ohio Department of Health issued the Stay Safe Ohio Order that reopened businesses, with exceptions, and continued a stay healthy and safe at home order.

Multiple areas of the United States are experiencing "community spread" of the virus that causes COVID-19. Community spread, defined as the transmission of an illness for which the source is unknown, means that isolation of known areas of infection is no longer enough to control spread.

SARS-CoV-2, the virus that causes COVID-19, has been demonstrated to transmit infection from infected persons when symptomatic, asymptomatic and pre-symptomatic.

Mass gatherings (10 or more persons) increase the risk of community transmission of the virus COVID-19.

Accordingly, I hereby **ORDER** that contact practice and training may resume for all sports. Only intra-club/team scrimmages are permitted for contact sports and practices/open gyms should be limited in the same way wherever possible. Competitive games and tournaments are permitted for non-contact sports only. as set forth in this Order. This Order shall remain in full force and effect until 11:59 p.m. on July 10, 2020, unless the Director of the Ohio Department of Health rescinds or modifies this Order at a sooner time and date. To the extent any public official enforcing this Order has questions regarding what services are prohibited under this Order, the Director of Health hereby delegates to local health departments the authority to answer questions in writing and consistent with this Order.

Lance D. Himes
Interim Director of Health

June 30, 2020
